EDUCATION

Yale University

Master of Science in Statistics and Data Science

Relevant Coursework: Probability Theory, Statistical Theory, Data Science Software Systems, Database Systems, Machine Learning, Multivariate Statistics, Linear Models, Case Studies

New Haven, CT

Aug 2023 - Dec 2024

University of California, Santa Barbara

Bachelor of Science in Statistics and Data Science

GPA: 4.00/4.00, Class Rank: 1/529

Santa Barbara, CA

Sep 2019 - Jun 2023

EXPERIENCE

Data Science Intern

Samsung Semiconductor

Jun 2024 - Aug 2024

San Jose, CA

- Developed ensemble predictive models (**neural networks, SVR, regression**) for NAND flash pricing using **Python, TensorFlow, Scikit-learn**, reducing model RMSE by 18% and improving pricing forecasts used to support profitability and inventory planning across storage product lines.
- Engineered ETL pipelines using **SQL, Python** to automate data extraction from analyst reports, reducing manual effort by 15 hours/month.
- Designed and deployed **Tableau** dashboards tracking business KPIs for executive stakeholders, enabling data-driven decisions on pricing strategy and inventory optimization.

Data Science Course Manager

Yale University

Jan 2024 - Dec 2024

New Haven, CT

- Instructed statistical theory concepts and streamlined grading for 150 students using **Python**, improving assessment consistency.
- Led biweekly meetings with teaching assistants, optimizing collaboration workflows and reducing feedback turnaround time by 24 hours/week.

Machine Learning Undergraduate Teaching Assistant

University of California, Santa Barbara

Sep 2021 - Mar 2023

Santa Barbara, CA

- Instructed 100+ undergraduate students in core machine learning and probability topics, including regression, classification, bias-variance tradeoffs, and model evaluation.
- Mentored students through assignments and projects involving Python-based ML workflows, improving conceptual understanding of algorithms and statistical modeling.
- Selected as Head Undergraduate Learning Assistant, mentoring new teaching assistants and standardizing instructional practices across course sections.

PROJECTS

CLIP Image Captioning Model | *Python, Git, HuggingFace, PyTorch, Pandas/Numpy*

Jan 2025 - Jul 2025

- Developed an AI-powered image captioning system by fine-tuning **CLIP** and **GPT-2** architectures.
- Optimized preprocessing pipeline for 300K+ image-text pairs, achieving 25% speedup and exceeding benchmark accuracy with **ROUGE-L: 0.51**

RAG Agent for Dental Data | *Python, GROQ API, Langchain, ChromaDB, HuggingFace*

Dec 2025 - Feb 2026

- Built a retrieval-augmented generation (RAG) AI system for dental datasets, enabling accurate question answering over structured and unstructured documents.
- Developed an end-to-end document pipeline: ingested PDFs and text files, added metadata, and split content into chunks for embeddings.
- Integrated an LLM to generate responses based on retrieved context, including features for summarization, streaming output, and citation tracking.

TECHNICAL SKILLS

Languages: Python, Java, SQL (MySQL/Postgres), JavaScript, HTML, R, Scala, MATLAB, Swift

Tools: Git, Docker, AWS, Apache Spark, Snowflake, Docker, Tableau, Power BI, Shiny, Excel, LaTeX, Julia

Libraries: Pandas, Numpy, TensorFlow, Keras, PyTorch, Scikit-learn, HuggingFace, XGBoost, Pytorch, LangChain, LangGraph
